Hello,

I have noticed that some gtk distributions are having problem with appropriate MenuBar item color (only upper menu!) when mouse cursor is on it (Gtk backend).

I enclose patch code. (CtrlLib/ChGtk.cpp - From line 542)

Sincerely,
Klugier

Hello Mirek,

My patch is wrong. It repairs systems such as: Xubuntu or Mint (With Cinamon), but it destroys Ubuntu.

I have find new sollution. It is shorter, but more tricky. We only need to patch one line of code:

```
s.topitemtext[1] = ChGtkColor(0, top_item);
```

If I will have a time, I make extra tests. I have enclose whole file, because I had to remove wrong lines of code.

Added:
I have made extra tests. It works as expected. At the end, I would like to apologize ultimate++ community for wrong patch.

Sincerely,
Klugier
