Subject: Get the row numbers currently drawn

Hello,

I was wondering. Is there a possibility to get the row numbers of the rows currently drawn? By that, I mean the rows that are visible to the user in the ArrayCtrl. If I need to derive a class from the ArrayCtrl in order to get them, that is fine. But I'm not sure where to look.

I think it is a good solution because my ArrayCtrl contains 1,000,000 rows, and I want a timer running to update the value of the rows currently in view, by ReadProcessMemory. It is too slow and expensive to update all million rows, so it would be much nicer if I could just update the rows that are visible!

Thanks in advance!

Hi Crydev,

Did you try bool GrdCtrl::InView()?

Hello BioBytes,

I am not able to, because I use the ArrayCtrl instead of the GridCtrl. I do not want to change because I like the SetVirtualCount feature. It made my UI very fast.

Thanks

Hello CryDev,

Perhaps you could have a look the ArrayCtrl Embedded functions:

IsCursor
checks whether cursor is in the table (identical to GetCursor() >= 0)
GetCursor
returns current cursor row, -1 when none
GetCursorSc
returns the location of the cursor row within the table view area
ScCursor
scrolls the table to move the cursor row to given location within the table view
CenterCursor
scrolls the table to move cursor into the middle of the current view
ScrollInto
scrolls the table by minimum amount necessary to make given row visible
ScrollIntoCursor
scrolls the table by minimum amount necessary to make cursor row visible
GetScroll
returns current table scrollbar location
ScrollTo
sets table scrollbar location
Find
locates table row containing a given element
FindSetCursor
moves the cursor to table row containing a given element

Some functions allow to check if the row is visible or not.

Regards

Biobytes

I was wondering. Is there a possibility to get the row numbers of the rows currently drawn? By
that, I mean the rows that are visible to the user in the ArrayCtrl.
After looking at ArrayCtrl::RefreshSel() method, I created following example to get visible range of
rows:
Toggle Spoiler

#include <CtrlLib/CtrlLib.h>

using namespace Upp;

```cpp
Tuple2<int, int> GetVisibleRange(const ArrayCtrl& array)
{
 int from, to;
 const int last = array.GetCount() - 1;

 if (last >= 0) {
  const int cy = array.GetSize().cy - 1,
   sb = array.GetScroll();

  from = array.GetLineAt(sb),
  to = array.GetLineY(last) <= cy ? last : array.GetLineAt(sb + cy);
 }
 if (last < 0 || IsNull(to) || from > to)
  from = to = -1;

 return MakeTuple(from, to);
}

class App : public TopWindow {
public:
 typedef App CLASSNAME;
 App();

 ArrayCtrl list;
 DropList dropCount;

 void OnGet();
 void OnSelect();
};

App::App()
{
 Title(t_("The visible range of rows for ArrayCtrl"));
 Sizeable().Zoomable();
 SetRect(Size(640, 480));

 list.AddRowNumColumn("Index").SetDisplay(StdCenterDisplay()).HeaderTab().SetAlign(ALIGN_
CENTER);
 const int count = 0x100000;
 list.SetVirtualCount(count);

 dropCount.AddButton().SetLabel(t_("Get")).Tip(t_("Get the visible range of
rows")).Left().WhenPush = THISBACK(OnGet);
 dropCount.SetDisplay(StdCenterDisplay()).WhenAction = THISBACK(OnSelect);
 dropCount.Add(0, t_("Empty"))
  .Add(10, 10)
  .Add(count, count)
```

```
    .SetIndex(2);

  Add(list.HSizePosZ(4, 4).VSizePosZ(4, 28));
  Add(dropCount.HCenterPosZ(100).BottomPosZ(4, 20));
}

void App::OnSelect()
{
 const int index = dropCount.GetIndex();
 if (index < 0)
  return;

 list.SetVirtualCount(dropCount.GetKey(index));
}

void App::OnGet()
{
 Tuple2<int, int> range = GetVisibleRange(list);

 PromptOK(range.b < 0 ?
  t_("The rows are not visible") :
  NFormat(t_("From %d to %d"), range.a, range.b));
/* // How to use the result:
 RDUMP(range);
 if (range.b >= 0)
  for (int i = range.a; i <= range.b; ++i)
   RLOG(i << ": " << list.Get(i, 0));
*/
}

GUI_APP_MAIN
{
 Ctrl::GlobalBackPaint();

 App app;
 app.Run();
}
```

Edit: Added comment about how to use the GetVisibleRange function result.

Thanks Sender Ghost! My response is late because I forgot about this thread. Your solution works fine
