Hello,

I have found the way how we can fix scrollbar artifacts on KDE.

We need to change QT part of GTK backend (CtrlLib/ChGtk.cpp - line 333):

```
s.overthumb = false;
```

Sincerely,
Klgier

Hello Mirek,

Why did you revert this patch on revision 6159? I am quite sure that overthumb constant on KDE should be false.

Sincerely,
Klugier
