Hi everybody!

I just found some interessting Methods and wanted to to test them, but they can't be found in my upp sources 2010 nor 2012.

Where do I find this:
http://www.ultimatepp.org/srcdoc$SysInfo$SysInfoDemo$en-us.h tml

and that:
http://www.ultimatepp.org/src$SysInfo$SysInfo$en-us.html

May I am too stupid to find

Thanks!

These packages are part of bazaar I think so you might want to have a look in your UPP installation folder. There should be a folder called 'bazaar' which contains these packages, at least they do for me

Yes, indeed!

Thanks!
I did a search on uppsrc, tutorial, examples, myApps and so on... but not on bazaar

Thank you very much!

//edit: mirek, you might want to add this information to the sites I posted above?

Hi NilaT,

If you are interested in features proposed by Bazaar package to add to your own projects, you should add the path to Bazaar to your UPP configuration as shown below:

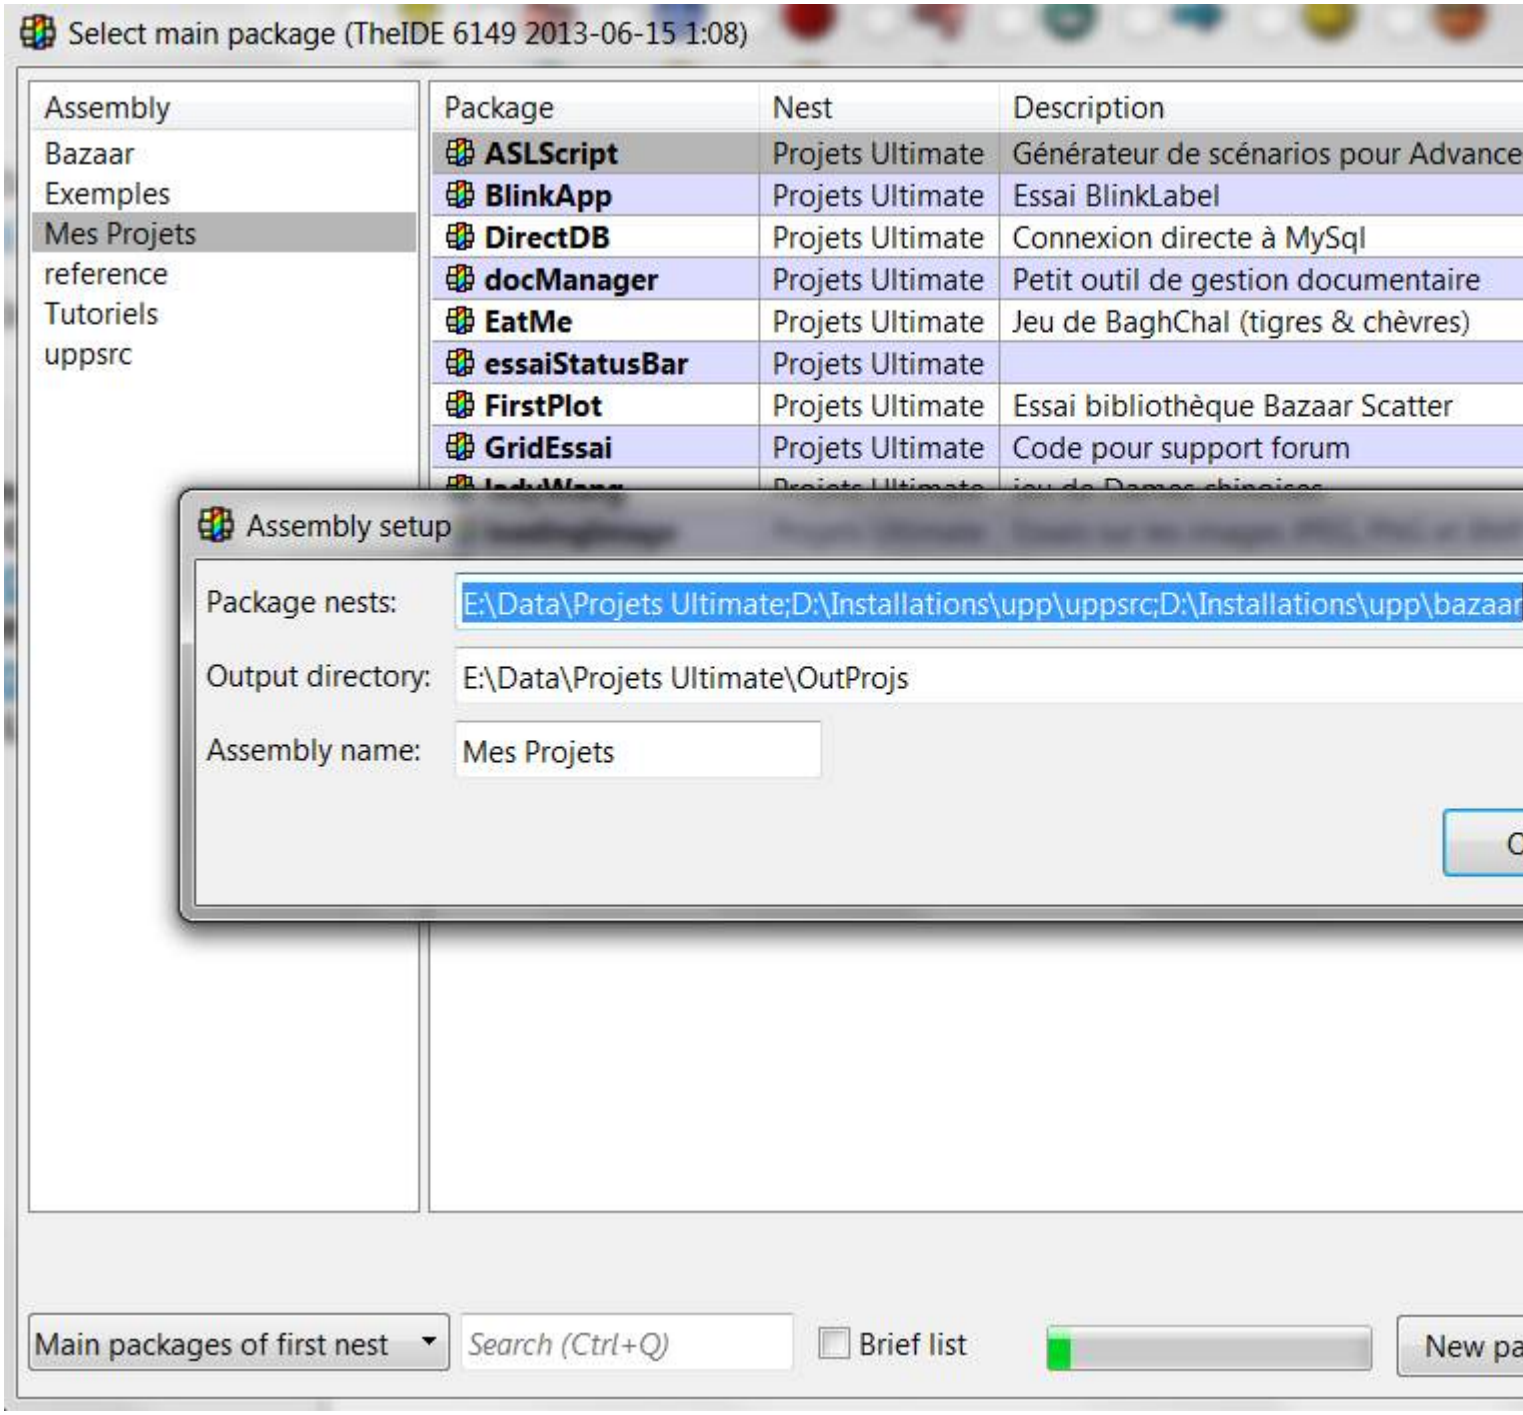

Hope this could be helpful

Regards

Biobytes
