Finally the site is back! But it's still running slow.

What happened guys?

I use www.monitorus.ru for monitoring and SMS info (Not as advertising, but really low-cost service).

Price - 0.004 Russian rubles for 1 check.
A have about 50 rubles per month (about 1 euro).

May be useful information for anybody...

But site is Russian.

Well, once per several months, it goes down, reason still unknown. I guess it is something about exhausting the memory. Usually I just restart (virtual) server.

It is not nice, but it only does that 4-5 times/year, so for now I am not investigating further.

Mirek

According to the experience of server maintenance - time between retries is constantly reducing. Eventually passing to the need to reinstall.
