Subject: Did something change in Controls4U? (Only drawing in Design mode)
Posted by lectus on Fri, 09 Aug 2013 16:32:58 GMT

I used to have a working application using Controls4U to draw a few rectangles to build an odontogram.

But now it's not drawing anymore when I run the app (only in the layout designer) (could be my mistake since it has been a few months since I last touched this project).

Any ideas?

Sorry... problem solved.

The problem was that I had Controls4U in MyApps and it compiled fine using that.

But to really work, I had to remove this folder and add C:\upp\bazzar to package nests.
