How to include some bazaar assemblies with ThIDE?
For example, i need upp\bazaar\OfficeAutomation

Hello iST1,

You can copy package from Bazaar to MyApps directory.

Sincerely,
Klugier

You can also add 'C:\path\to\upp\bazaar' to your MyApps assembly, or create a new one that would contain point to both MyApps and bazaar (and uppsrc of course) directories. I'd say changing the assembly settings is better than copying, because when copying directories around, you'll sooner or later end-up with out-of-date sources.

You can also have a look at the manual pages describing
[http://www.ultimatepp.org/app\\$ide\\$PackagesAssembliesAndNests\\$en-us.html](http://www.ultimatepp.org/appidePackagesAssembliesAndNests$en-us.html) and their configuration.

Best regards,
Honza
