Subject: [BUG & Patch] Printing under POSIX dosen't work.

Hello,

It seems that POSIX printing dosen't work. The main problem with POSIX printing is that we are creating wrong "lp" command on some configuration. The correct command should look like this:

lp -d network-printer -o media=A5,Default -o number-up=1 -n 1

Insted of:

lp -d network-printer -o media=,Default -o number-up=1 -n 1

what is definitly incorrect.

I enclosed patched source file (CtrlLib/PrinterJob.cpp). What I have changed?
- The printing code is more secure (More logical conditions).
- "A4" is now the default page format in PrinterDlg.
- Minor fixes.

P.S.
"lp" - console utility which is used to print the files.

Sincerely,
Klugier

Hello Mirek,

Printing under POSIX vol. 2.
It seems that cancel and system cross buttons don't work in PrinterDlg window. I decided to rewrite PrinterDlg source code.

Now everything should work as expected!

Sincerely,
Klugier
