My default Windows language is Rus, but by default FileSel has Eng,
wherein

is ok, but with

SetLanguage(GetSystemLNG());=>FileSel obtain Rus

The most likely cause is that GetSystemLNG returns current 8-bit character encoding of host OS, while text you have written in theide is, by default, UTF-8.

Try

SetLanguage(SetLNGCharset(GetSystemLNG(), CHARSET_UTF8));

Special folder translated, but internally not:
At left - FileSel dialog
At right - my Windows actualy view

method).

Ha, I have to say I am really surprised that windows translates the names of those folders... On filesystem, it is still "Music".

It is quite weird hack on windows part.

Will think about that.
