Wanted to illustrate JoinFixedCells bug, but editing not work:

```
GUI_APP_MAIN
{
 TopWindow wnd;
 GridCtrl grid;

 grid.AddColumn("Col1");
 grid.AddColumn("Col2");
 grid.Editing()
  .Sorting(false)
  .OneClickEdit();

 wnd.Add(grid.SizePos()) ;
 grid.AddRow();
 grid.Set(0, 0, "Cell1");
 grid.Set(0, 1, "Cell2");
 wnd.Run();
}
```

You forgot to add editor to the column.

```
EditString myEdit;
grid.AddColumn("Col 1").Edit(myEdit);
```

Insert error (maybe) happened:

Add -> Add -> Add
#if 1

#if 0 (view artefact - gray field)
Add -> Add -> Insert(1)

```
GUI_APP_MAIN
{
 TopWindow wnd;
 AppGrid grid;

 wnd.Add(grid.SizePos());
 grid.AddColumn("Col1");
 grid.AddColumn("Col2");

 grid.Add();
 int ir = grid.GetRowCount() - 1;
 grid.JoinCells(0, ir, 1, ir);
 grid.Set(ir, 0, "c11");
 grid.Set(ir, 1, "c12");
#if 0
 grid.Add();
 ir = grid.GetRowCount() - 1;
 grid.Set(ir, 0, "c21");
 grid.Set(ir, 1, "c22");

 grid.Add();
 ir = grid.GetRowCount() - 1;
 grid.Set(ir, 0, "c31");
 grid.Set(ir, 1, "c32");
 grid.JoinCells(0, ir, 1, ir);
#else
 grid.Add();
 ir = grid.GetRowCount() - 1;
 grid.Set(ir, 0, "c31");
 grid.Set(ir, 1, "c32");
 grid.JoinCells(0, ir, 1, ir);

 grid.Insert(ir);
 grid.Set(ir, 0, "c21");
 grid.Set(ir, 1, "c22");
#endif
 wnd.Sizeable();
 wnd.Run();
}
```

if you click on the title to sort, disappeared row showing:

I have it generally fixed, but I'm still working on some other join + insert column/row scenarios.
Please wait a little bit longer

Hello unodgs, the changes in r6450 works fine.

Can you give advice about replacing Collumn alignment by Row alignment?

```
GUI_APP_MAIN
{
 TopWindow wnd;
 GridCtrl grid;

 wnd.Add(grid.SizePos());
 grid.AddColumn("C").AlignCenter();

 grid.Add();
 grid.Set(0, 0, "c");
 grid.GetRow(0).AlignLeft();//not work
 wnd.Run();
}
```
