I worked without compile problems with 5485 under Windows and VC9, but after updating to 6372 when compiling got:
c:\upp\uppsrc\core\Core.h(156) : fatal error C1083: Cannot open include file: 'windef.h': No such file or directory
Back revert to 5485 does not help.

What is so removed 5485 uninstaller before 6372, once before 5485 worked fine?
