Subject: [QUESTION] Should ChGTK emulate SColorMenuMark?
Posted by Klugier on Tue, 01 Oct 2013 23:19:12 GMT

Hello,

Personally, I think that ChGTK should emulate following color: SColorMenuMark. Why? Because, this solution will allow us to prevent GTK theming issues.

What do you think guys about this idea?

Sincerely,
Klugier

Well, menu is tricky. ChGTK originally was more aggresive, but then it did not worked well with specific themes...
