Subject: append in logging not working

Hello,

For some time I had the problem that LOG_APPEND would actually not work. I saw you guys noticed it also... here...
I think it can be solved as follows (in Core/Log.cpp):

```
void LogOut::Create(bool append)
{
 Close();

 if (!append) { // <- when appending, none of the following is needed
  char next[512];
  for(int rot = options >> 24; rot >= 0; rot--) {
   char current[512];
   if(rot == 0)
    strcpy(current, filepath);
   else
    sprintf(current, rot > 1 && (options & LOG_ROTATE_GZIP) ? "%s.%d.gzip" : "%s.%d",
            filepath, rot);
   if(FileExists(current)) {
    if(rot == (options >> 24))
     FileDelete(current);
    else
    if((options & LOG_ROTATE_GZIP) && rot == 1 && !IsPanicMode())
     SaveFile(next, GZCompress(LoadFile(current)));
    else
     FileMove(current, next);
   }
   strcpy(next, current);
  }
 }
```

cheers
