Subject: GetSmartTextSize() function move/factorisation proposal

Hi,

GetSmartTextSize(), GetSmartTextHeight() and DrawSmartText() could be moved from CtrlLib to somewhere else (maybe RichText package) not dependent on CtrlLib so they can be used in Draw dependent apps only.

Almost the exact same methods already exist in RichText package in the following methods:
QTFDisplayCls::GetStdSize()
QTFDisplayCls::Paint()
So these methods could probably also profit from a factorization
