SpreadSheet control? I know there is ArrayCtrl. But is it adequate?

Well, SpreadSheet control looks quite specialised to me, but it is possible. I guess Daniel's GridCtrl might be a step in this direction.

I'm almost ready with GridCtrl. I'm not sure if it is better for spreadsheet than arrayctrl, but of course one can try. I am only sure about one point my grid is more suitable than arrayctrl in this case. It supports vertical (not only horizontal) fixed columns which can be resized in various ways. I need some time to prepare documentation and some kind of www (but I rather would like Mirek to create special subpage of upp site for third party controls) - so be patient
