Total size of language strings for even Core can be quite extensive, so per request new compilation flag NOI18N excludes them from the resulting binary.

Mirek

Thanks a lot Mirek! Which revision contains this flag? I tried 6773 but I think it does not yet contain it.

Thanks,
crydev

Hi crydev,

It was added in revision no 6769.

Thanks andreincx,

My apologies, I was looking in the wrong place. This addition is very nice, thanks again!

The application was 2005 kb in size (Optimal VC10) without the flag, and 1875 kb in size with the flag enabled. Over 2000 strings seem to be removed. Great work.

Regards,
crydev
