I get an error when compiling ANY Upp project that has a .rc file included. Using MSC10

Example compiling GoogleTranslator:

----- CtrlLib (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (1 / 11)
----- GoogleTranslator (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (2 / 11)
----- CtrlCore (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (3 / 11)
----- Draw (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (4 / 11)
----- plugin/bmp (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (5 / 11)
----- RichText (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (6 / 11)
----- Core (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (7 / 11)
----- plugin/z (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (8 / 11)
----- plugin/png (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (9 / 11)
----- Web (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (10 / 11)
----- GoogleTranslatorDemo (GUI MT MAIN MSC10 DEBUG DEBUG_FULL WIN32 MSC) (11 / 11)
GoogleTranslatorDemo.rc

There were errors. (0:00.28)

Compilation succeeds once I remove the .rc file.
Any clues?
Tks!

Hello kropniczki

In my case it works. TheIDE is from this weekend. From when is yours?

You can also set Setup/Be verbose to have more detailed messages.

Thank you Koldo for the very prompt response.

Totally my fault: I didn't check the box "Tools" in the installation options when installing SDK for Windows 7, so I did not get the rc.exe installed and theIDE consequently couldn't process any .rc file, though:

Best regards!

Maybe in that case it would be possible to show a message to know that rc.exe does not exist.

Did you try the "Be verbose" option?

Did you try the "Be verbose" option?

Yes, I agree. Indeed, I used verbose mode, but got no alert message whatsoever.

Anyway, not that I want to make a big thing of it, if I may suggest, the Ultimate++ Win32 Installation Guide could include another bullet point indicating the need to mark the tools section in the SDK installation wizard. This could be especially supportive to new U++ adopters.

thank you!
