Hello all,

I've got the nightly built 04/10/2014 07:12:25 upp-win32-7207.exe
and get this bug. May I forget something?

In file included from C:/upp/out/MyApps/CtrlCore/MINGW.Debug.Debug_Full.Gui\\$(blitz
.cpp:145:0:
C:/upp/uppsrc/CtrlCore/ImageWin32.cpp: In member function 'void
Upp::ImageSysData::Paint(Upp::SystemDraw&, int, int, const Rect&, Upp::Colo
r)':
C:/upp/uppsrc/CtrlCore/ImageWin32.cpp:288:43: error: 'SHADEBLENDCAPS' was not declared in
this scope
C:/upp/uppsrc/CtrlCore/ImageWin32.cpp:288:62: error: 'SB_PIXEL_ALPHA' was not declared in
this scope
C:/upp/uppsrc/CtrlCore/ImageWin32.cpp:288:77: error: 'SB_PREMULT_ALPHA' was not declared
in this scope
CtrlCore: 57 file(s) built in (0:02.29), 40 msec / file, duration = 4718 msec, parallelization 100%
RichText: 22 file(s) built in (0:07.47), 339 msec / file, duration = 9969 msec, parallelization 91%

There were errors. (0:10.25)

Do you have latest MINGW? It seems like something is missing in headers...

Hi Mirek,

THank you!

Hello Mirek

I have the same problem, even after reinstalling TDM GCC, but only in 32 bits. Maybe the problem is this:

- In Core/config.h, line 17, there is a #define WINVER WindowsXP

- In wingdi.h, there is a:

```
#if(WINVER >= 0x0500)
```

```
#define SHADEBLENDCAPS 120
```

```
...
```

This means that SHADEBLENDCAPS and other are not included.

I have the same problem, even after reinstalling TDM GCC, but only in 32 bits. Maybe the problem is this:

- In Core/config.h, line 17, there is a #define WINVER WindowsXP

- In wingdi.h, there is a:

```
#if(WINVER >= 0x0500)
```

```
#define SHADEBLENDCAPS 120
```

```
...
```

This means that SHADEBLENDCAPS and other are not included.

I have tested with my copy of mingw, seems OK, so I am unable to provide a reliable fix.

I would propose fixing this with something like

```
#ifndef SHADEBLENDCAPS
```

```
#define SHADEBLENDCAPS 120
```

```
#endif
```

.... and so forth, put into ImageWin32.cpp.

Could you try that please?

Mirek

Hello Mirek

SHADEBLENDCAPS, SB_PIXEL_ALPHA, and others are already defined. By any reason, in Core/config.h, line 17, there is a `#define WINVER WindowsXP`, so all includes in wingdi.h are discarded, as all of them are under a `#if(WINVER >= 0x0500)`.

Just removing the `#define WINVER WindowsXP` or using a `#define WINVER 0x0500` would solve the problem.
