---

Found the next one.

In SDLExample in Linux the include would normally be  
`#include <SDL/SDL.h>`

It currently is

`#include <SDL.h>`

Just looked it up at the sdl website and from a tutorial link from there it appears that `#include <SDL/SDL.h>` is normal for windows and Linux.

[http://lazyfooproductions.com/SDL\\_tutorials/lesson01/index.p hp](http://lazyfooproductions.com/SDL_tutorials/lesson01/index.php)

Also the SDL library isn't being linked in, but I don't know how to add that in your system.
