Hello,

after upgrading my system, now lubuntu 14.4, I am non longer able to compile with version 6634.
The error is

/home/luigi/upp/uppsrc/Draw/FontFc.cpp:13:29: fatal error: freetype/ftxf86.h: File o directory non esistente

I run even
sudo apt-get install freetype*
with no success. Perhaps the new distro no longer support that file?

Thanks,
Luigi

Hi Luigi,

I believe it is this bug: http://www.ultimatepp.org/redmine/issues/653. What is the version of freetype on your system?

The problem is already solved, you'll just have to use newer version of U++ - 6817 or higher.

Best regards,
Honza

Hi Honza,

you are right. After upgrading it works.
Thank you,
Luigi
