Subject: [Linux] Tooltips and pop-up windows don't disappear when TheIde is losing focus

Hi,

When I am switching between TheIde and other applications, tooltips and pop-up windows stay always on top.
Maybe TheIde should hide them when focus is lost?

Was there a regression? I still have this problem on 4.15.0-64-generic #73-Ubuntu && Upp v.13393
It's not just Assist, it's all popup windows doing it. I was also able to crash TheIDE with a memory allocation error if I alt+tabbed right when Assist was rendering.

Just to be sure, can you check with trunk please? (current version is 13624)

Took forever to build, but yes, it's still an issue as of 13621.

I guess it must be Unity related. I have just tried with Compiz/MATE/Ubuntu 16.04 and all seems fine.

It could be Cinnamon-related, I never considered that.
EDIT: after trying MATE, it appears to be a Cinnamon issue.

OK, will try with Cinnamon ASAP.

Mirek

Awesome, it appears to be fixed in TheIDE. Now I have to figure out why I have the same problem just making a straight call to PopUp.

Do you react to Deactivate?

Do you react to Deactivate?

Mirek

Nope, I will now. :d I'm trying to do some janky thing where I want an irregular shaped tooltip, so to cover up for the lack of transparency I'm copying the background behind the PopUp and redrawing over it. It doesn't fix the drop shadow problem but the window is dark anyway so you have to look closely to notice.

Is the reaction by override? I'm inheriting from Ctrl and Deactivate never seems to be called.

Edit: ahh, looking at ToolTip it installs a mouse hook and state hook. I'll try that.

Yeah, you basically need to override Deactivate to close the popup. I guess menu (or Assist) is better example here.
