Hello,

theide version 7282 crashed while trying "Synchronize translation file" on my package.
However, my code is compiled without error and works perfectly.

Other package seems to be not affected by the same problem.
Is my message.t file that has problem? It is rather long. Is there a way to undestrand where the problem is?

Thank you,
Luigi

Hello Luigi,

Please try to update IDE to the lates Upp version. Some time ago (r7386) we fixed similar bug.

Sincerely,
Klugier

Hello Klugier,

thank you. I have no jpg plugin package. I suspect the error is somewhere else. With me it localize it in one of my file.
Just now I verified that theide 7298 on linux does not have such bug.

Luigi

EDIT: with the latest windows version, 7379, the bug disappeared

EDIT2: but now I see that some dialog are not translated although the translation is present :roll:
