Hello,

I have Upp 7390. It miss to perform the translation of my latest dialog.

I mean that the `t_("string")` are are not translated although the translation is present. Of course I did the synchronization.

Have you the same behaviour?

Luigi

EDIT: the 7298 under linux works properly

The screenshot shows the Vega 7 beta 6 application window. The main window has a menu bar with 'File', 'Classifica', 'Extra', 'Verbali', and 'Aiuto'. Below the menu bar are three tabs: 'Giocatori', 'Gestione Turno', and 'Output'. The 'Gestione Turno' tab is active. A 'License Manager' dialog box is open in the foreground. The dialog has a title bar 'Vega 7 beta 6' and a menu bar with 'File', 'Classifica', 'Extra', 'Verbali', and 'Aiuto'. The dialog contains several sections: 'License details' with fields for 'Email', 'Registered by Arbiter/Club', 'Federation', 'Expire date', 'Upgrade', and 'License serial number'. There is a 'Verify serial number' button below the 'License serial number' field. Below the 'License details' section is a 'Send me the ordered license' button. At the bottom of the dialog is a 'Paste here the license file' section with a large text area and a 'Validate the license file' button. At the very bottom of the dialog are 'Save license' and 'Close' buttons. In the background, a table is visible with columns 'S' and 'Titolo'. The table has one row with '5' in the 'S' column and an empty cell in the 'Titolo' column. To the right of the table, there is a 'Registriati' section with 'T=0 P=0 B=0 A' and a 'base 3' section with a 'Turno' column containing '0'.
