Subject: [BUG] RichTextView and VCenter
Posted by timl on Sat, 07 Jun 2014 17:07:53 GMT

Hello!
I belive that VCenter(bool) method defined in RichTextView stands for vertical center and should make the text vertically centered, right? It seems that calling this method makes no difference and I belive it's a bug. This is the case both for "current" release 5485 and for one of the latest svn versions (I updated like week and a half ago).

Thanks, fixed.
