How about zoom support with moving of mouse like in Delphi Charts? It is difficult? I think it is very useful in scientific applications.

Hello iST1

I do not know how is the mouse behavior in Delphi Charts. Could you please explain it?

Best regards
Koldo

Zooming is done by drawing rectangle with the mouse; to restore the original scale - motion with mouse to the left while holding down the left mouse.

It would also be very best to shift the X-axis on the right-left movement pressed right mouse

Hello iST1

Mouse behavior is fully configurable by program. See this.

Anyway I will add a new properties tab to let user to change this. This tab would be only accessible in DEBUG mode.

Hello iST1

Zoom window has been added, by default by using Ctrl key.
