Since the update of today to Rev. 7565 numerous dialogs within theide complain of invalid numbers. An example is the image designer where you cannot add a new image, or duplicate an existing one, with size 16 x 16.

There was an error in StrInt function,
introduced in rev 7564 and fixed in rev 7567.

Please update, it should be fixed now.

Indeed!! Thanks.
The only teardrop is that the iml file is empty now.
