Front page has latest svn as 7604
nightly builds stuck on 7591 now for weeks and weeks and ...
;)

Thanks, I know. Will fix soon - need to upgrade the compiler (and whole process).

Mirek

hi mirek

latest svn == 7806
nightly builds == 7786

Quote:Thanks, I know. Will fix soon - need to upgrade the compiler (and whole process).

every now-and-then my projects reach a stage where I can update my dev-environment,
this includes all packages used & I like to have the latest versions of all of them
so I can benefit from improvements and fixes.

my dev-setup precludes me using svn directly: it is designed so I can easily revert
to a previous setup should an update/upgrade proof bad.

thx

Just want to point to the PPA of Jan Dolinar. The Version there is 7740.  :roll:

Either the PPA or OBS. But unfortunately, both are also little bit behind, as I had to change my
hardware few weeks ago and haven't had time to set up the automated nightly builds yet :(

Hi Honza,

The nightly PPA appears to lag weeks behind. 7886 seems to be the last build available there.
Could you take a look at it? I'm not in any hurry at all though.

Thanks and best regards,

Tom
