Step by step:
1. Create core console project in MyApps.
2. The "create header", "commandline loop", "multithreaded", and "Use SSE2" checkboxes are unchecked.

And while compiling this simple code:
#include <Core/Core.h>

using namespace Upp;

CONSOLE_APP_MAIN
{
 Cout() << "Hello world from U++...";
}

I got these errors:
Quote:
----- Core (MSC12 WIN32 MSC) (1 / 3)
cl : Command line warning D9024 : unrecognized source file type 'Files\Microsoft', object file assumed

 nsoleTest\ConsoleTest.cpp   -FoC:/upp/out/MyApps/ConsoleTest/MSC12.Main\ConsoleTest.obj' ignored
cl : Command line warning D9021 : no action performed
ConsoleTest: 1 file(s) built in (0:00.01), 15 msecs / file, duration = 15 msecs, parallelization 0%
Linking...
LINK : fatal error LNK1181: cannot open input file 'C:\upp\out\MyApps\ConsoleTest\MSC12.Main\ConsoleTest.obj'

There were errors. (0:00.96)

Looking at things like "Files\Microsoft", "-IC:\Program", etc, it seems that TheIDE cannot parse the path to VS 2013 properly?

I'm using the latest package (upp-win32-7721.exe), anyway.

That is weird. What is missing is '\"' quotes around include paths - but that is usually added by standard.

You can activate Setup/Verbose to see exactly what is going into commandlines.

Have you tried to specify include paths yourself somehow?

So I tried once again with the verbose option enabled.
This is the complete log:
http://pastebin.com/QRg6QZ9h

By a quick glance, it is easy to see that there are plenty "unrecognized source file type" line
Google search pointed me to this: http://msdn.microsoft.com/en-us/library/zfsbakc5.aspx
Seems that that's a warning, rather an error.
On the other hand, the actual errors are linker errors. I'm not really sure about this. Maybe the
U++ libs themselves are not built properly?

And BTW, I didn't specify the include paths myself.
These are what I found on the Build Methods (which are correct):
Quote:
PATH - executable directories
C:\Program Files\Microsoft Visual Studio 12.0\Common7\IDE
C:\Program Files\Microsoft Visual Studio 12.0\VC\bin
C:\Program Files\Windows Kits\8.1\bin\x86

INCLUDE directories
C:\Program Files\Microsoft Visual Studio 12.0\VC\include
C:\Program Files\Windows Kits\8.1\Include\um
C:\Program Files\Windows Kits\8.1\Include\shared
C:\Program Files\Windows Kits\8.1\Include\winrt

LIB directories
C:\Program Files\Microsoft Visual Studio 12.0\VC\lib
C:\Program Files\Windows Kits\8.1\Lib\winv6.3\um\x86

:?

Hm, I have an idea:

-I"C:\upp\apps\"

I would say that it is possible that Win32 takes the \ before " as escape, so that " is ignored and
that breaks the whole thing.

I believe the \ got there when you were defining your assembly ("C:\upp\apps\;C:\upp\uppsrc").

OK, now after reproducing I am 100% sure it was the culprit.

I have added a code to remove trailing \\ from path when quoting it in order to avoid bad surprises in the future... :)
