About ArrayCtrlDnD example,

a) comment out line that makes ArrayCtrl multiselect:

```
App() {
 a.AddColumn("You can paste the text here too");
 //a.MultiSelect();
            ...
```

b) try to drag and drop LAST array line somewhere else into same ArrayCtrl (a).
c) the whole ArrayCtrl gets cleared and just last line gets added.

Bug? Must ArrayCtrl be multiselect for DnD to work?

tks.

p.s. using IDE 7542
