Subject: ide: .log file highlitghting
Posted by mirek on Mon, 13 Oct 2014 14:42:22 GMT

Today, hunting for errors in the log, I got an idea for .log highlighting:

- lines that contain a word from the specific set ("error", "errors", "failed" ....) are now highlighted
- in addition, numbers and some characters (e.g. [ ] : ...) are highligted too
