Subject: search for " A " in "B A A B", does not find the second " A ".
Posted by omari on Wed, 17 Dec 2014 17:59:31 GMT

Hello,

replacing the line (FindReplace.cpp/197

 pos = cursor;

by

 pos++;

resolve the issue.

```
bool CodeEditor::Find(bool back, bool block)
{
 foundsel = true;
 if(notfoundfw) MoveTextBegin();
 if(notfoundbk) MoveTextEnd();
 foundsel = false;
 int cursor, pos;
 if(found)
  GetSelection(pos, cursor);
 else
  GetSelection(cursor, pos);
 pos++;// = cursor;                 <===
 bool b = FindFrom(pos, back, block);
 findreplace.amend.Enable(b);
 return b;
}
```

Thanks.

I consider this behaviour correct... Next search IMO should start after the string that you have just found...

Mirek

OK,

Thanks
