Hello,

usage examples:

UdpClient:

```
UdpClient c("localhost", 4000);
String r = c.Send("Hello").Receive();
```

UdpServer:

```
void Listen1(UdpPeer& peer)
{
    String request = peer.Get();
    peer.Send("Thanks");

    if(finish)peer.StopServer();
}

CONSOLE_APP_MAIN
{
    UdpSrvr srv;
    srv.Listen(4000, Listen1);

    while(srv1.IsRunning()) Sleep(1000);
}
```

update : bug fix.

Thanks
