Hello,

usage examples:

UdpClient:

```
UdpClient c("localhost", 4000);  
String r = c.Send("Hello").Receive();
```

UdpServer:

```
void Listen1(UdpPeer& peer)  
{  
    String request = peer.Get();  
    peer.Send("Thanks");  
  
    if(finish)peer.StopServer();  
}
```

```
CONSOLE_APP_MAIN  
{  
    UdpSrver srv;  
    srv.Listen(4000, Listen1);  
  
    while(srv1.IsRunning()) Sleep(1000);  
}
```

update : bug fix.

Thanks
