Hi I install open ssl and added the path to the static libs. I got no error when i compile, but I get a SSL Handshake error when I try to connect to a https page. Do you know what is going on ?

```
http.New();  
http.RequestTimeout(2000).SSL(true).Url( url ).Execute();
```

Most likely you do not have Core/SSL in your project. It is separated because it requires OpenSSL .dlls to be on path.

Also, you do not need to use "SSL(true)" here (HttpRequest does it based on URL).
