
Subject: Image DnD into Upp app

Posted by [bushman](#) on Wed, 14 Jan 2015 14:28:47 GMT

[View Forum Message](#) <> [Reply to Message](#)

Hi, there!

I need to drag an image file from a Windows non-Upp app (say, File Explorer, for one) and drop/show it on a StaticImage Ctrl. Is there a Upp way of doing this? How, pls?

tk!

```
#include <CtrlLib/CtrlLib.h>
```

```
using namespace Upp;
```

```
struct MyApp : TopWindow {  
    virtual void CancelMode();  
    virtual void Paint(Draw& w);  
    virtual void DragAndDrop(Point p, PasteClip& d);  
    virtual void DragLeave();  
};
```

```
Image img;  
bool dnd;
```

```
MyApp() { dnd = false; }  
};
```

```
void MyApp::Paint(Draw& w)  
{  
    Size sz = GetSize();  
    w.DrawRect(sz, dnd ? SColorInfo() : SColorFace());  
    w.DrawImage(0, 0, img);  
}
```

```
void MyApp::DragAndDrop(Point p, PasteClip& d)  
{  
    if(AcceptImage(d))  
        img = GetImage(d);  
    dnd = d.IsAccepted();  
    Refresh();  
}
```

```

void MyApp::DragLeave()
{
    CancelMode();
}

void MyApp::CancelMode()
{
    dnd = false;
    Refresh();
}

GUI_APP_MAIN
{
    MyApp().Run();
}

```

Thank you for the code, Mirek, but I'm afraid it doesn't work. BTW, before I posted this topic I've tried something quite close to what you suggest, based on what I could learn from the IDE help and reference code, but it failed too.

I've inserted some LOGs in your code to see if any of the DnD-related virtual methods ever get called, which they don't, with the exception of CancelMode(), but obviously for other non-DnD reasons:

```

#include <CtrlLib/CtrlLib.h>

using namespace Upp;

struct MyApp : TopWindow {
    virtual void CancelMode();
    virtual void Paint(Draw& w);
    virtual void DragAndDrop(Point p, PasteClip& d);
    virtual void DragLeave();

    Image img;
    bool dnd;

    MyApp() { dnd = false; }
};

void MyApp::Paint(Draw& w)
{

```

```

Size sz = GetSize();
w.DrawRect(sz, dnd ? SColorInfo() : SColorFace());
w.DrawImage(0, 0, img);
}

void MyApp::DragAndDrop(Point p, PasteClip& d)
{
    LOG("DragAndDrop");           // this never gets called
    if(AcceptImage(d))
        img = GetImage(d);
    dnd = d.IsAccepted();
    Refresh();
}

void MyApp::DragLeave()
{
    LOG("DragLeave");              // this never gets called
    CancelMode();
}

void MyApp::CancelMode()
{
    LOG("CancelMode");
    dnd = false;
    Refresh();
}

GUI_APP_MAIN
{
    MyApp().Run();
}

```

Aren't we missing something? There's something I do not quite fully understand here, I mean, how is our code supposed to acknowledge it should accept DnD data from other non-Upp Windows processes? Doesn't Windows require us to somehow register our Upp process as potential target of DnD events?

Thanks again!

Now that is really weird. Of course, I have tested my code before posting here (with Win8 and now

Win7).

As first quick test, does DnD of text to theide work for you?

Alternatively, you can test with examples/UWord, with Image.

What is your OS exactly? Compiler?

As for your question, U++ does all that for you. All you need to do is to call "Accept" for format that you, ehm, accept...

Mirek

Hello kropniczki

Quote:Aren't we missing something? There's something I do not quite fully understand here, I mean, how is our code supposed to acknowledge it should accept DnD data from other non-Upp Windows processes? Doesn't Windows require us to somehow register our Upp process as potential target of DnD events?

I copy and paste daily data as formatted texts and tables from/to U++/Microsoft applications without problems so I imagine your problem is very specific to images in some particular situation.

[View Forum Message](#) <> [Reply to Message](#)

Hi, Mirek, tks for your help, it's weird indeed, I've run a number of tests on both of my systems and here's my feedback on some of the points you raised:

Quote:What is your OS exactly? Compiler?

Windows 7 - MSC9 and Windows 8.1 - MSC9 and MSC10

Quote:As first quick test, does DnD of text to theide work for you?

No, it doesn't work in Win 8.1, but it does work in Win 7.

Quote:Alternatively, you can test with examples/UWord, with Image.

Did that, pls review code posted below, which I used to run tests, along with attached table pics summarizing results:

```
#include <CtrlLib/CtrlLib.h>
```

```
using namespace Upp;
```

```

struct MyApp : TopWindow {
    virtual void CancelMode();
    virtual void Paint(Draw& w);
    virtual void DragAndDrop(Point p, PasteClip& d);
    virtual void DragLeave();

    Image img;
    String txt;
    bool dnd;

    MyApp() { dnd = false; }
};

void MyApp::Paint(Draw& w)
{
    Size sz = GetSize();
    w.DrawRect(sz, dnd ? SColorInfo() : SColorFace());
    w.DrawImage(0, 0, img);
    w.DrawText(10, 10, txt);
}

void MyApp::DragAndDrop(Point p, PasteClip& d)
{
    LOG("DragAndDrop");
    if(AcceptImage(d)) {
        img = GetImage(d);
        txt = "";
    } else if(AcceptText(d)) {
        txt = GetString(d);
        img.Clear();
    }
    dnd = d.IsAccepted();
    Refresh();
}

void MyApp::DragLeave()
{
    LOG("DragLeave");
    CancelMode();
}

void MyApp::CancelMode()
{
    LOG("CancelMode");
    dnd = false;
    Refresh();
}

```

```
GUI_APP_MAIN
{
  MyApp().Run();
}
```

Could these erratic results be due to non-standardized Windows DnD obj formatting from one version to another?
Tks!

Hi, Koldo!
Good for you and all other users who may not be facing the same issues, and I hope you're right about it being something specific to my situation. Nevertheless, please observe that I performed tests on two different Windows OS configurations and got mixed results as you can see in the reply I posted on Mirek's response in this topic.

Appreciate your concerns, tks!

```

Could these erratic results be due to non-standardized Windows DnD obj formatting from one version to another?
Tks!

I would not read too much into File Explorer source - these are expected - UWord expects (now) that you are dropping qtf formatted files, which these images are not.... (of course, would be nice to automatically open images too...)

Have you tried with U++ apps as source? (E.g. UWord->MSWord)

Another: please try e.g. Firefox or Chrome as source of images.

Mirek

Subject: Re: Image DnD into Upp app
Posted by [mirek](#) on Thu, 15 Jan 2015 20:11:34 GMT

Also please try this logging:

```
STDMETHODIMP UDropTarget::DragEnter(LPDATAOBJECT pDataObj, DWORD grfKeyState,
POINTL pt, LPDWORD pdwEffect)
{
    GuiLock __;
    LLOG("DragEnter " << pt);
    data = pDataObj;
    data->AddRef();
    fmt.Clear();
    IEnumFORMATETC *fe;
    if(!ctrl || pDataObj->EnumFormatEtc(DATADIR_GET, &fe) != NOERROR) {
        *pdwEffect = DROPEFFECT_NONE;
        return NOERROR;
    }
    FORMATETC fmtetc;
    while(fe->Next(1, &fmtetc, 0) == S_OK) {
        fmt.FindAdd(FromWin32CF(fmtetc.cfFormat));
        if(fmtetc.ptd)
            CoTaskMemFree(fmtetc.ptd);
    }
    fe->Release();
    DUMP(fmt)
    DnD(pt, false, pdwEffect, grfKeyState);
    return NOERROR;
}
```

That should show formats available.

Actually, from table you have posted, only MS Word -> theide/UWord make me really worried...
Note that UWord does not support gif (forgot to add plugin/gif) and bmp format is tricky...

Quote:Have you tried with U++ apps as source? (E.g. UWord->MSWord)
Don't recall any Upp app example that exposes imgs to DnD operations for now, so I limited my tests just to texts.

Quote:Actually, from table you have posted, only MS Word -> theide/UWord make me really worried...

Win8.1 - MSC10:

TEXT: UWord -> MSWord = ok.

TEXT: MSWord -> TheIDE = failed.

TEXT: MSWord -> UWord = failed, format DUMP:

Here are my test results for now, pls observe we got no issues whatsoever related to any copy/paste operations, whereas mixed results were obtained for DnD.

Windows 7 - MSC9:

Copy(JPG, MSWord) -> Paste(UWord) == ok, no DUMP created

Drag(JPG, MSWord) -> Drop(UWord) == failed, DUMP:

* C:\upp\out\examples\MSC9.Debug.Debug_Full.Gui\UWord.exe 16.01.2015 16:48:58, user: admin

Descriptor]

Copy(TEXT, MSWord) -> Paste(UWord) == ok, big DUMP

Drag(TEXT, MSWord) -> Drop(UWord) == ok, big DUMP

Copy(JPG, Firefox) -> Paste(UWord) == ok, no DUMP generated.

Drag(JPG, Firefox) -> Drop(UWord) == ok, DUMP:

* C:\upp\out\examples\MSC9.Debug.Debug_Full.Gui\UWord.exe 16.01.2015 16:58:39, user: admin

fnt = [text/x-moz-url, FileGroupDescriptor, FileGroupDescriptorW, FileContents, UniformResourceLocator, UniformResourceLocatorW, text/x-moz-url-data, text/x-moz-url-desc, text/uri-list, text/_moz_htmlcontext, text/_moz_htmlinfo, text/html, HTML Format, wtext, text,

application/x-moz-file-promise-url, application/x-moz-file-promise-dest-filename, DragImageBits, DragContext]

Copy(TEXT, Firefox) -> Paste(UWord) == ok, no DUMP generated.

Drag(TEXT, Firefox) -> Drop(UWord) == ok, DUMP:

* C:\upp\out\examples\MSC9.Debug.Debug_Full.Gui\UWord.exe 16.01.2015 17:08:36, user: admin

fnt = [text/_moz_htmlcontext, text/_moz_htmlinfo, text/html, HTML Format, wtext, text, DragImageBits, DragContext]

Windows 8.1 - MSC9:

Copy(TEXT, MSWord) -> Paste(UWord) == ok, big DUMP.

Drag(TEXT, MSWord) -> Drop(UWord) == failed, no DUMP generated.

Copy(JPG, MSWord) -> Paste(UWord) == ok, no DUMP generated.

Drag(JPG, MSWord) -> Drop(UWord) == failed, no DUMP generated.

Copy(TEXT, Firefox) -> Paste(UWord) == ok, no DUMP generated.

Drag(TEXT, Firefox) -> Drop(UWord) == failed, no DUMP generated.

Copy(JPG, Firefox) -> Paste(UWord) == ok, no DUMP generated.

Drag(JPG, Firefox) -> Drop(UWord) == failed, no Dump Generated.

tk.

[View Forum Message](#) <> [Reply to Message](#)

As for JPG: MSWord -> UWord, from the log you have posted, it looks like the problem is that MSWord actually presents it as text (rich text) and our RTF parser does not understand JPG in RTF. I am adding RM issue to add JPG support in ParseRTF....

So it looks like copy/paste is mostly working, but DnD is not.

For now, let us concentrate just on MS Word text -> UWord in Windows 8.1. Could you please activate general logging in Win32DnD.cpp at the start of file:

```
#define LLOG(x) LOG(x)
```

```
(uncomment // LOG(x))
```

try dragging text to UWord, post result here?

Mirek

Did that, all attempts failed and no log ever gets created when dragging text from MS Word into UWord in Win 8.1.

Eddy.

Just found this:

<http://www.eightforums.com/general-support/15434-drag-drop-problem.html>

Any chances you are running theide (and AFAIK the program you launch from theide) in admin mode or something?

The pattern you show indicates right that: you can DnD between theide and uword (I supposed you started it from theide), but not between external application and theide/uword...

Might be interesting to start uword from shell, not theide...

Mirek

[View Forum Message](#) <> [Reply to Message](#)

Bingo! Absolutely correct! Text DnD from MS Word to UWord works perfectly in Win8.1 when UWord starts from shell, just as you pointed out. Great!

Yet, although image copy/paste works like a charm for both, Win 8.1 and 7, can't DnD JPG from MS Word to Uword still. Dump shows:

WIN8.1 - MSC9:

* C:\upp\out\examples\MSC9.Debug.Debug_Full.Gui.Mt\UWord.exe 18.01.2015 07:12:54, user: admin

fmt = [Art::GVML ClipFormat, ~ĩSü@

® ĩĩ , PNG, JFIF, GIF, ,ÿ-ûà R ĩĩ , Object Descriptor]

WIN 7 - MSC9:

* C:\upp\out\examples\MSC9.Debug.Debug_Full.Gui\UWord.exe 18.01.2015 07:21:41, user: admin

fmt = [Woozle, Object Descriptor, Rich Text Format, HTML Format, text, wtext, F...űű Óó , Embed Source]

{\rtf1\ad...

... FOLLOWS EXTENSIVE TEXT APPARENTLY ON FONT/TEXT FORMATTING PARAMETERS
.....

... FOLLOWED BY WHAT I GUESS TO BE ABOUT PICTURE FORMATTING:

```

Win7 MSWord -> UWord JGP DnD now dumps
* C:\upp\out\examples\MSC9.Debug.Debug_Full.Gui\UWord.exe 18.01.2015 07:52:02, user:
admin

Descriptor]
, instead of very extensive file (!)

tk.

OK, the rest appears to be format issue.

I do not have MS Word to test, so I would like to ask for more data:

```
bool PasteClip::Accept(const char *_fmt)
```

```

{
Vector<String> f = Split(_fmt, ';');
for(int i = 0; i < f.GetCount(); i++) {
    if(IsAccepted() && fmt == f[i])
        return paste;
    if(IsAvailable(f[i])) {
        accepted = true;
        if(paste) {
            fmt = f[i];
            DDUMP(fmt); // NEW
            data = Get(f[i]);
            SaveFile(GetHomeDirFile("data.bin"), data); // NEW, Set appropriate path here....
            return true;
        }
        break;
    }
}
return false;
}

```

then D&D JPG from MSWORD->UWORD, post format here and zipped data.bin...

Mirek

Mirek,

Attached files data.bin and UWord.log as requested.

Pls note that these files regard results of tests done on Win7 only. Same test does not create any log or bin file in Win8.1; checked variable 'fmt' in for-loop and it is always empty; execution never goes into scope of if(IsAvailable(fmt[i])).

Thank you!

Thanks. I have fixed ParserRTF, so it is now able to load that data correctly.

Mirek

Hello, Mirek,

Splendid! Almost there...

...works great in Win7 now, but still does not drop jpg from MS Word into UWord in Win8.1. Test output creates a blank data.bin and this fmt LOG:

```
* C:\upp\out\examples\MSC9.Debug.Debug_Full.Gui.Mt\UWord.exe 22.01.2015 17:05:00, user:
admin
fmt = dib
```

DnD jpg from File Explorer into UWord works perfectly in both OS versions.

Any hint on what to try next?

Many thanks!!!

Well, looks like problem with dib... Some more logs:

```
Image GetImage(PasteClip& clip)
{
    GuiLock __;
    Image m;
    if(Accept<Image>(clip)) {
        LoadFromString(m, ~clip);
        if(!m.IsEmpty())
            return m;
    }
    if(clip.Accept("dib")) {
        LOG("DIB accepted");
        String data = ~clip;
        if(((unsigned)data.GetCount() < sizeof(BITMAPINFO)) return Null;
        LOG("DIB accepted 2");
        BITMAPINFO *lpBI = (BITMAPINFO *)~data;
        BITMAPINFOHEADER& hdr = lpBI->bmiHeader;
        byte *bits = (byte *)lpBI + hdr.biSize;
        if(hdr.biBitCount <= 8)
            bits += (hdr.biClrUsed ? hdr.biClrUsed : 1 << hdr.biBitCount) * sizeof(RGBQUAD);
        if(hdr.biBitCount >= 16 || hdr.biBitCount == 32) {
            if(hdr.biCompression == 3)
                bits += 12;
            if(hdr.biClrUsed != 0)
                bits += hdr.biClrUsed * sizeof(RGBQUAD);
        }
        DUMP(bits);
        DUMP((int)hdr.biHeight);
        DUMP((int)hdr.biWidth);
        int h = abs((int)hdr.biHeight);
        ImageDraw iw(hdr.biWidth, h);
        ::StretchDIBits(iw.GetHandle(),
            0, 0, hdr.biWidth, h,
            0, 0, hdr.biWidth, h,
            bits, lpBI, DIB_RGB_COLORS, SRCCOPY);
        return iw;
    }
    return Null;
}
```

}

Thanks!

Mirek

I want to let you know that my UBUNTU 14.04 (AMD64) refuses the Drag and Drop operation as well.

A recent update of UPP brought in "reference" a DragAndDropImg. I generated an executable with "GUI" and "GCC Optimal". When I ran it I kept it in the starter. Both times, when active or only in the starter, dragging bushman's avatar to the starter lit Firefox and Gimp only, but not the unnamed application DragAndDropImg. So I can drop the image to Firefox or Gimp, but not to DragAndDropImg.

Mirek,

tried out your latest advice, size of accepted data does not match size of BITMAPINFO struct (data.GetCount() == 0):

* C:\upp\out\examples\MSC9.Debug.Debug_Full.Gui.Mt\UWord.exe 23.01.2015 16:02:45, user: admin
DIB accepted

Just a few Side Comments:

Maybe it's something specific to my Win8.1 installation after all. This time I also did a few tests dragging jpg from MS Word into both LibreOffice and OpenOffice Writer and they failed too, showing only blank img frames over a doc background.

Both LibreOffice and OpenOffice show context menu options to dialogs to manipulate imgs when you right-click on img frame icon. These dialog boxes however show copies of the DnDropped img thumbs, which they save in a TMP file. So I'm confused: how come the img can't be shown on document while they save and show it correctly from a TMP file?

Thank you once more, for your patience!

Well, let us see what word really puts there... It looks really weird, like data are truncated or not complete or perhaps contain some HANDLE...

```
if(clip.Accept("dib")) {  
LOG("DIB accepted");  
    String data = ~clip;  
DUMPHEX(data);  
}
```

OK, let us try this:

```
String UDropTarget::Get(const char *fmt) const
{
    FORMATETC fmtetc = ToFORMATETC(fmt);
    STGMEDIUM s;
    HRESULT hr = data->GetData(&fmtetc, &s);
    DDUMP(hr); DDUMP(hr == S_OK); DDUMP(s.tymed); DDUMP(s.tymed ==
TYMED_HGLOBAL);
    if(hr == S_OK && s.tymed == TYMED_HGLOBAL) {
        char *val = (char *)GlobalLock(s.hGlobal);
        String data(val, (int)GlobalSize(s.hGlobal));
        GlobalUnlock(s.hGlobal);
        ReleaseStgMedium(&s);
        return data;
    }
    return Null;
}
```

Thanks for patience. And keep that Win installation, it is a good testing environment :)

Actually, I'm just waiting for the last straw that will make me format my Win8 system. This OS
version should be codenamed "Windows Nightmare" instead. :)

Well, here we go again:

```
* C:\upp\out\examples\MSC9.Debug.Debug_Full.Gui.Mt\UWord.exe 26.01.2015 16:57:39, user:
admin
hr = -2147221404
hr == ((HRESULT)0L) = false
s.tymed = 0
s.tymed == TYMED_HGLOBAL = false
DIB accepted
data = Memory at 0018E754, size 0x0 = 0
```

Tks!
