Subject: CastleBuilder - simply 2D platform game with editor
Posted by Klugier on Sun, 01 Mar 2015 13:48:20 GMT

Hello,

I would like to show my last year project for my studies. It was implemented on "Programing games in C++" course (2013/2014 - summer). This is simply 2D platform game with level editor.

Features:
- level is represented by special xml file (save/load feature is implemented).
- level debugging feature.
- whole written in Upp.
- game is rendering using "Painter".
- game scrolling. (Level can be bigger than screen resolution)
- layers support.
- around 2,5K lines of code.

Sincerely,
Klugier

Hi Klugier,

Do you plan to make source available on this forum.

This can be good example for programming.

Hello Deep,

At the moment there are no plans to open this project, but maybe in the future I will decide to do

this.

The code is overcomplicated to be good example.

Sincerely,
Klugier

Hello Klugier,

Thanks for response.

My particular interest is about drawing on different layers. Enable / Disable layers.

Looking for some examples for using Layers.

Hello Klugier,

2.5k lines of code, doesn't seem to much for this app : maybe your code isn't that bad :roll:

Hello Deep,

In layer code there is really no magic. Unless you want to play with transparency (My simply
engine doesn't allow that).

Here is part of draw level method:

```
 for (int layer = level.getLayers() - 1; layer >= 0; layer--) {
  for (int row = 0; row < level.getRows(); row++) {
   for (int col = 0;  col < level.getCols(); col++) {
    int x0 = col * c - view.x;
```

```
    int y0 = row * c - view.y;

    // Don't paint invisible ellements
    if (x0 + c > 0 && y0 + c > 0 && x0 - c < sz.cx && y0 - c < sz.cy) {
     drawElement(bp, layer, row, col, x0, y0, c, complete || gameOver);
    }
   }
  }

          // ... draw player, draw enemies etc. ...
 }
```

P.S.
I will consider making this code open source. But, firstly I will need to do some code cleaning's...

Sincerely,
Klugier

Hello,

Screen shot presenting another level:

Sincerely,
Klugier
