Subject: Newer Layout Designer Is Missing A Control

We have a large U++ application based on upp-2007-1.

We are migrating to a newer U++ upp-x11-src-8201 and have found that DateTimeCtrl is missing from Layout Designer.

A compile-time error occurs pointing to the following from our application's layout file:

 ITEM(DateTimeCtrl, _CalExpDate, LeftPosZ(740, 256).TopPosZ(80, 24))

The error is:

  error: Invalid use of template-name 'upp::DateTimeCtrl' without an argument list

DateTimeCtrl no longer exists in the newer Layout Designer.
However, that control does exist in the older upp-2007.1 Layout Designer.

What can we do regarding this?

regards,
Jeff Franks

Hello, Jeff.
jfranks wrote on Sun, 05 April 2015 14:31What can we do regarding this?
I think, you could try to replace DateTimeCtrl with DropDate definition:
ITEM(DropDate, _CalExpDate, LeftPosZ(740, 256).TopPosZ(80, 24))
Based on the source code changes, the DateTimeCtrl was converted to (generic) template class,
where DropDate and DropTime inherits from it.

Yes, that worked very well.

Thank you for your help.
