Hi all,

I tried to use mscv10 64 bit version. It is installed in my computer.  
I used Ultimate ide's automatic setup...  
However, when I used ultimate ide, it does not work.

When I compile my project, I get

----- CtrlLib ( GUI MT SSE2 MSC10X64 WIN32 MSC ) (1 / 21)

cd d:\upp342015\uppsrc\CtrlLib

PCH: CtrlLib.h

compiled in (0:00.00)

compiled in (0:00.00)

compiled in (0:00.01)

compiled in (0:00.00)

compiled in (0:00.01)

compiled in (0:00.01)

compiled in (0:00.00)

compiled in (0:00.00)

compiled in (0:00.00)

compiled in (0:00.00)

compiled in (0:00.01)

compiled in (0:00.00)

compiled in (0:00.01)

compiled in (0:00.01)

compiled in (0:00.00)

compiled in (0:00.01)

compiled in (0:00.00)

compiled in (0:00.01)

I think it does not find cl for some reason.

32bit version works for me.

The same problem with Mscvc 11 and 12...

Could you fix it?

Thanks.

A.

With your help, maybe :)

It is no rocket science, the problem will be wrongly setup directories. If you could report what you have in build method and what are correct values (it is not so hard to setup build method manually...).

Mirek

Hi Aftershock,

My MSC12x64.bm file is

```
BUILDER = "MSC12X64";
COMPILER = "";
COMMON_OPTIONS = "/Zm200";
COMMON_CPP_OPTIONS = "";
COMMON_C_OPTIONS = "";
COMMON_FLAGS = "";
DEBUG_INFO = "2";
DEBUG_BLITZ = "1";
DEBUG_LINKMODE = "0";
DEBUG_OPTIONS = "-Od";
DEBUG_FLAGS = "";
DEBUG_LINK = "";
RELEASE_BLITZ = "0";
RELEASE_LINKMODE = "0";
RELEASE_OPTIONS = "-O1 -GS-";
RELEASE_SIZE_OPTIONS = "-O1 -GS-";
RELEASE_FLAGS = "";
RELEASE_LINK = "";
DEBUGGER = "";
```

PATH =

```
"C:\\Program Files (x86)\\Microsoft Visual Studio 12.0\\Common7\\IDE;
C:\\Program Files (x86)\\Microsoft Visual Studio 12.0\\VC\\bin\\x86_amd64;
C:\\Program Files (x86)\\Microsoft Visual Studio 12.0\\VC\\PlatformSDK\\bin\\x64;
C:\\Program Files (x86)\\Windows Kits\\8.1\\bin\\x64;
C:\\Program Files (x86)\\Microsoft Visual Studio 12.0\\VC\\bin";
```

```
INCLUDE = "C:\\Program Files (x86)\\Microsoft Visual Studio 12.0\\VC\\include;
C:\\Program Files (x86)\\Microsoft Visual Studio 12.0\\VC\\PlatformSDK\\Include\\um;
C:\\Program Files (x86)\\Microsoft Visual Studio 12.0\\VC\\PlatformSDK\\Include\\shared;
C:\\Program Files (x86)\\Microsoft Visual Studio 12.0\\VC\\PlatformSDK\\Include\\winrt;
```

```
C:\\Program Files (x86)\\Windows Kits\\8.1\\Include\\shared;  
C:\\Program Files (x86)\\Windows Kits\\8.1\\Include\\um";
```

LIB =

```
"C:\\Program Files (x86)\\Microsoft Visual Studio 12.0\\VC\\lib\\amd64;  
C:\\Program Files (x86)\\Microsoft Visual Studio 12.0\\VC\\PlatformSDK\\Lib\\winv6.3\\um\\x64;  
C:\\Program Files (x86)\\Windows Kits\\8.1\\Lib\\winv6.3\\um\\x64";
```

```
LINKMODE_LOCK = "0";  
ALLOW_PRECOMPILED_HEADERS = "1";
```

Set up PATH,LIB and Include as per your installation and it will work.

Particularly pay attention to x64 entries

I guess compile log in verbose mode (menu: Setup > Be verbose) would help here.

Yes, that helped.
