I know is still in development, but for SVN 8506.

umk does not compile.

uppsrc\umk\umake.cpp(55) : error C2259: 'Ide' : cannot instantiate abstract class
due to following members:
'Upp::String IdeContext::IdeGetIncludePath(void)' : is abstract

And for some reason TheIde likes to show the "Parsing Code" dialog every time a file is deleted, every time a file is compiled and every time a program is built or debug is run. This can take a minute or two every time its shown.

Should be fixed. I will add "umk compiles" check to nightly autotests...

Yes, that is about the last part to be fixed - correct detection whether file is to be reparsed, reducing number of places that invoke the check. It is pretty tough issue...
