Control4U does not compile anymore

it is a trivial fix were FD_ZERO must be replaced by FD_ZEROS

```
void VLC_Demo::UpdateInfo() {
    if (!player.IsLoaded()) {
        offline = "ActiveX or program not available";
        return;
    } else
        offline = "";
    int t = player.GetTime();
    if (t == -1)
        time <<= "-";
    else
        time <<= FormatDouble(t/1000., 2, FD_ZERO); ==> must be FD_ZEROS
    int l = player.GetLength();
    if (l == -1)
        length = "-";
    else
        length = FormatDouble(l/1000., 2, FD_ZERO); ==> must be FD_ZEROS
}
```

Thank you Sgifan.

Apparently Controls4U_Demo has been updated to svn server after this fix was done locally.
However this file was not uploaded 8o
