Hi everybody,

There is a long time I was on the forum  :blush: . Of course there is a lot of things that have changed in the amazing U++ development tool.

So Idecided to update my sustem to SVN 8672 and I got a compiling error either with MSC9 (Windows XP computer) and MSC11 (Windows 7 computer). The pictures corresponding to the errors are enclosed. The problem is that an error comes up in Functions4U file. A conversion cannot be done at line 565 in Functions4U.h header (Local process).

Hope this could help to correct this issue

Cheers  :p

Hello BioBytes

I could not find the problem. Could you upload the Functions4U.h file you have?

Hi Koldo,  :)

Just tested SVN 8687 on my Win XP (MSC 9) and everything is compiling correctly now. I saw that the LocalProcess function was modified. I am at the office now and I must wait this evening to check the SVN 8687 on my Win 7 (MSC 11). However I am pretty sure that it will work now.

As required find attached my Functions4U.h file as obtained from SVN 8672.

Hope this could be helpful. Thanks for your efforts.

Regards  :p

Hello BioBytes

You have the latest version. I think all has to work right now.

Please check it and tell me if everything is ok.

Hello Koldo,

I uploaded SVN 8693 and everything is working perfectly now (both on Win XP and Win 7). Nice work as usual Koldo  :p

Thank you very much. U++ is defintively a great developing tool (thank you also Mirek).

Good evening
