Hello,  
i have this ArrayCtrl :

ArrayCtrl list;

```
list.AddColumn(t_("Title"));
list.AddColumn(t_("Author"));
list.AddColumn(t_("City"));
list.AddColumn(t_("Telephone"));
```

if i want change the column's name, how can I do?

Best Regards,  
Gianni

Hello giamal84

You may try this:

```
list.HeaderTab(column).SetText("New name");
```

---
