Subject: Compilation against MINGW32 is broken

Could you please replace code below in function void ChSysInit()

#if (WINVER >= 0x0600)

with

#if (WINVER >= 0x0600 && !defined(__MINGW32_VERSION))

This should fix compilation against MINGW32. It doesn't define
NONCLIENTMETRICS::iPaddedBorderWidth.
MINGW64 is fine.

I tested this issue against TDM-GCC-32 (gcc version 5.1.0 (tdm-1))

Thanks.
