Hi,

I generated basic GUI application:

```
#include <CtrlLib/CtrlLib.h>

using namespace Upp;

#define LAYOUTFILE <UppTest2/UppTest2.lay>
#include <CtrlCore/lay.h>

class UppTest2 : public WithUppTest2Layout<TopWindow> {
public:
 typedef UppTest2 CLASSNAME;
 UppTest2() { CtrlLayout(*this, "Window title"); }
};

GUI_APP_MAIN
{
 UppTest2().Run();
}
```

and it runs fine with GTK backend, but as soon as I add NOGTK flag it starts crashing.

Stack trace (Ubuntu 14.04, 64-bit, gcc 4.8.4):

```

const**)>, argc=1, argv=0x7fffffffdf88, init=0x6a26b0 <__libc_csu_init>, fini=<optimized out>,
    rtld_fini=<optimized out>, stack_end=0x7fffffffdf78) at libc-start.c:246
#24 0x0000000000407749 in _start ()

It looks that there is something wrong with fonts creation.
