I have just finished (manual) setup of theide for VS 2015 compiler. Works without problems except one linker warning (will need to add MSC15 build method), but finding right directories is quite cumbersome, so if you want to try, here is the .bm file... (32-bit result).

Addenum: There are issues with WindowsXP support. In theory, we should use "140_xp" toolchain.

In practice, this seems to work:

https://tedwvc.wordpress.com/2014/01/01/how-to-target-xp-with-vc2012-or-vc2013-and-continue-to-use-the-windows-8-x-sdk/

I have 'fixed' build method to specify 5.01 version of system and with static linking, all seems good and fine. Amen...
