Hello,

the starting point is UWord example.

I am trying, without success, to let appear the FindReplaceTool() tool with a mouse right click on the document window.

Any suggestion will greatly appreciated.

Luigi

Hi Luigi,

To achieve what you want do this,

Add Function with required menu bars

```
void UWord::PopUpBar(Bar& bar)
{
    editor.FindReplaceTool(bar);
    editor.UndoTool(bar);
    editor.RedoTool(bar);
}
```

Add this to editor.WhenBar like this in UWord constructor (UWord::UWord) at the end.

```
editor.WhenBar << THISBACK(PopUpBar);
```

if you use "=" in place of "<<" then original menu will be replaced.
With "<<" new menu added to original menu.

Hi Deep,

thanks a lot!
It works as expected.

Luigi
