---

```
void Set(int id, bool b) { option[id]->Set(b); SetOption(id); }
```

koldo wrote on Mon, 23 November 2015 21:15void Set(int id, bool b) { option[id]->Set(b);  
SetOption(id); }  
In addition to this proposal it would be great and very simple to have these other features:

```
int GetCount() const { return option.GetCount(); }
```

```
Callback1<int> WhenOption; // Now WhenOption does not return the option selected
```
