Hello all

I wanted to ask you how to set a child Ctrl as the top most visible one.

Is there a kind of SetChildIndex()?

I wanted to ask you how to set a child Ctrl as the top most visible one.

Is there a kind of SetChildIndex()?

Topmost visible is the last one. It is OK to insert/add Ctrl that is already somewhere, Ctrl code will remove it first. So the easiest way should be just to add it again:

```
dlg.Add(ctrl);
```

Thank you Mirek :)

It works:

```
RemoveChild(&child);  
Add(child);
```

Actually, I believe that RemoveChild is not even needed. In fact, there is even some optimization in AddChild that makes not using RemoveChild optimal.
