I debugging the console app form IDE.
What should I press to display the console window output?
I need enter to it a different values.

Hello Mq35

Theoretically TheIDE should have to open automatically a console window when debugging a console application, so does it happen?

In this case please send us the operating system you use, version, compiler, U++ version, etc to know what is your environment.

Console window not opened when i debugging console application.

I use TheIDE version 9251 (32 bit) Compiled 12/01/2015 10:55:33 on Windows 10 pro (10.0.10586).

MinGw:
gcc (tdm64-1) 5.1.0
GNU ld (GNU Binutils) 2.25

Hello Mq35

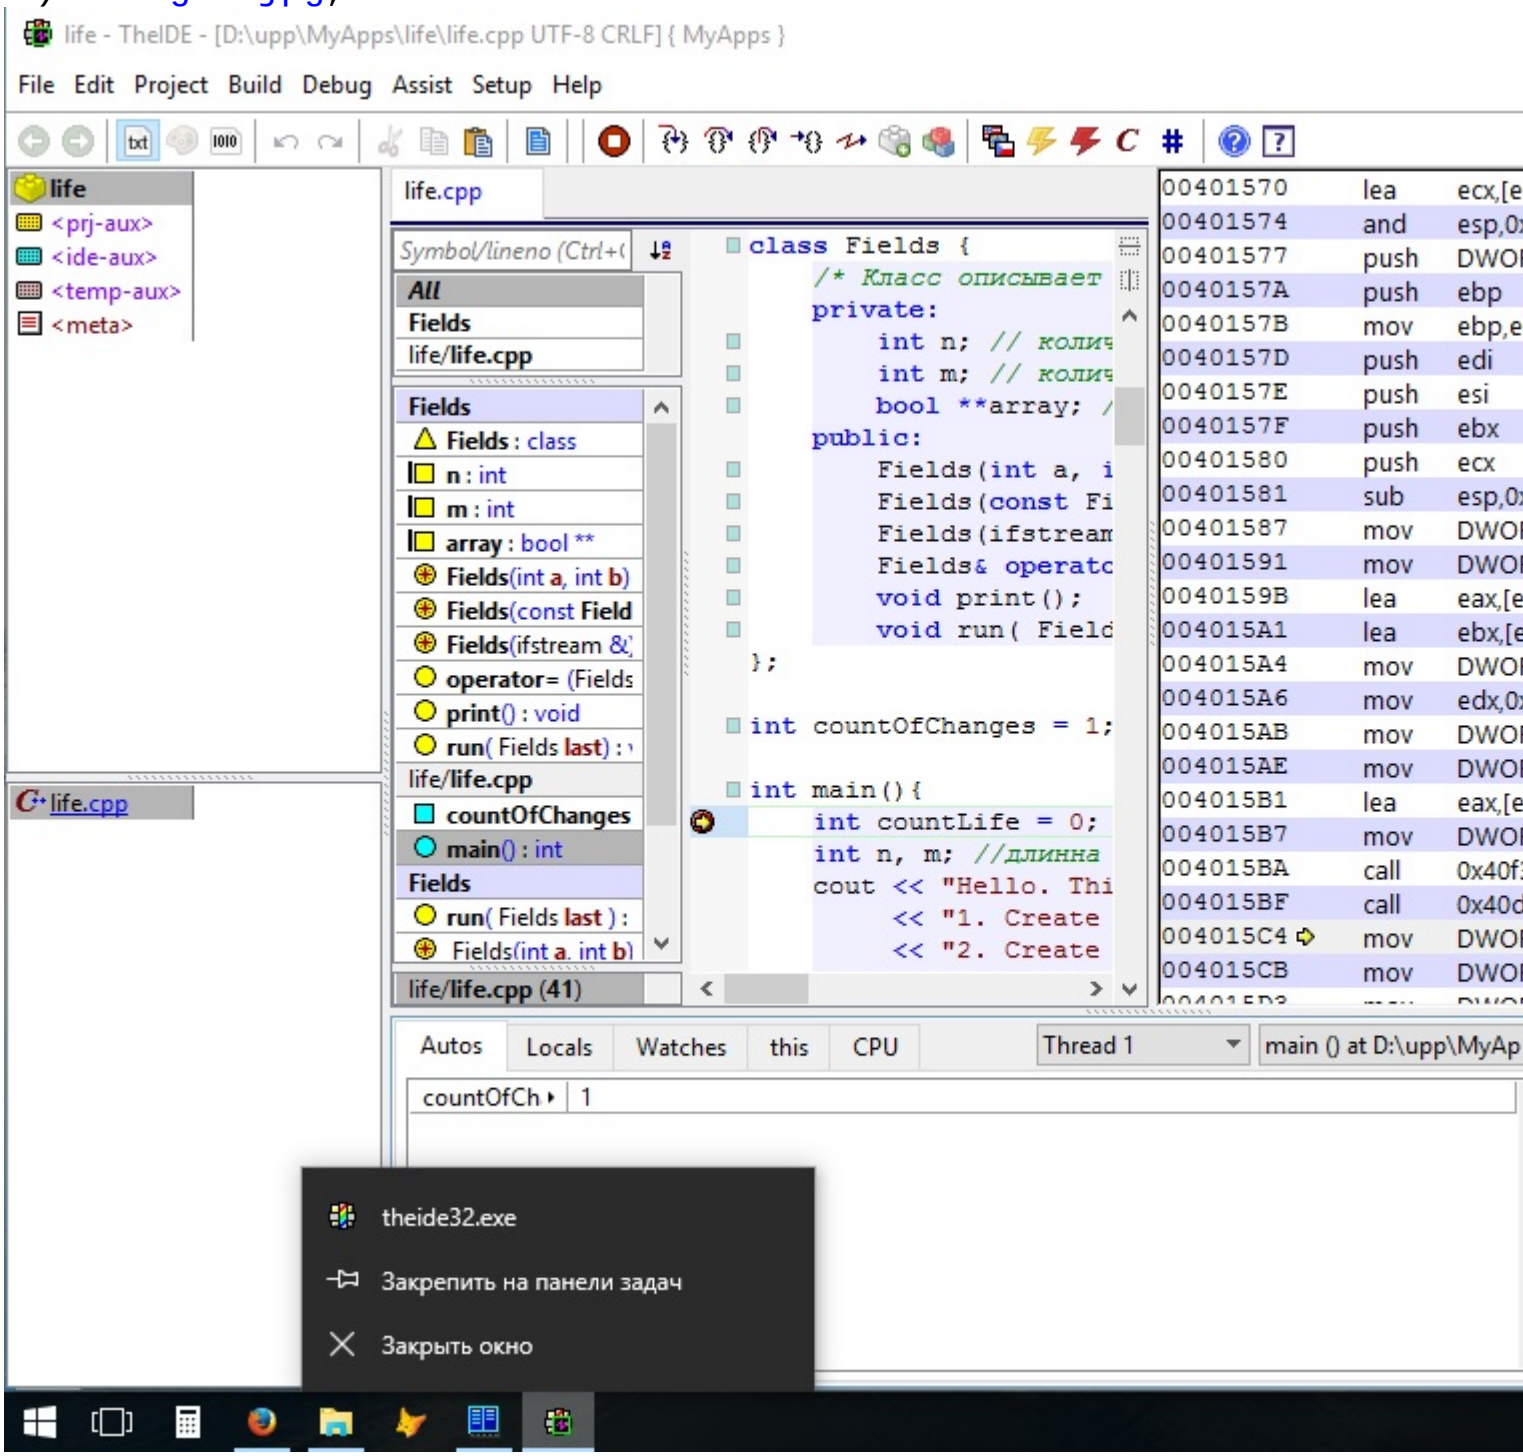

I do not have Windows 10. However just in case you could try the latest TheIDE build from here.

I download last night build (2016-01-01 05:53 upp-mingw-9360.7z)
And i run the debuger.
Console output windows is not show.

Thank you Mq35 for your patience. It seems everything is ok from your side,

Does anybody there has a Windows 10 system to check this?

Hello,

I can confirm that with default Upp Mingw. I created redmine issue http://www.ultimatepp.org/redmine/issues/1370 for this obvious bug.

Visual studio debbuger works fine. Visual studio installation guild you can find here: http://www.ultimatepp.org/appideinstall$en-us.html. Alternativly you can execute your app (CTRL + F5 or from menubar Debug -> Execute) to read std output from app instead of debugin it.

Sincerely,
Klugier

Hello,

We finally manage to deal with that issue. It is solved in version 11184 and above. I would like to notice that problem is not only Windows 10 related, but it occurs on other windows operating system as well.

I would like to thanks Omari for finding the origin of the issue and proposed complex patch. Thanks!

Sincerely,
Klugier
