Subject: IntStr function returns an empty string

Hello,

I run into an issue with formatting numbers. I'm not sure whether this is a mistake or rather a bug. When I call the IntStr function with 0x80000000 as value, the FormatIntBase function returns an empty string. It seems to fail at formatting this number. What can I do?

Regards,

crydev

0x80000000 is Null. That is why it is empty string.

You can use e.g. Format("%d", ...)
